

Technical Data

Color	Black
Sizes Available	W5-W11
Packaging	Boxed
Packed	10 Pair/Case
Case Dimensions (in)	22.44 x 17.32 x 12.99
Case Weight (lbs)	27.56
Country of Origin	China
Footwear Height	Low
Footwear Insole	evercushion CUSTOM FIT
Footwear Width	B
Gender	Women
Lining	BreathActive
Material	Sandwich Mesh
Toe Type	Composite
Construction	Slip Resistant
Certifications	ASTM F2413-18
Product Circularity	--

PUMA® Safety

Frontside Blk/Pink Womens LOW Composite Toe Impact Resistant Toe Cap, Electrical Hazard protection, Slip Resistant, Safety Shoes

- **RUBBER OUTSOLE** - This hard-wearing 572°F heat- and oil-resistant rubber outsole has a distinctive tread design with channels to clear fluids for optimum slip resistance. Due to the reinforcement of the rotation point, friction and thus signs of fatigue can be significantly reduced.
- **EVA MIDSOLE** - Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.
- **idCELL** - The idCELL element in the heel area consists of EVA, a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.
- **ROTATION POINT** - The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.
- **COMFORT FOOTBED** - The anatomically shaped footbed provides optimal cushioning with every step. The specially designed arch support enables the foot to be naturally positioned in the shoe and stimulates the muscles when walking.
- **EVERCUSHION® BA+** - Maximum performance for your work shoes. The contoured evercushion® BA+ footbed follows the shape of the foot and ensures a natural position, pressure relief and muscle stimulation. It is made of two layers of breathable foamed polyurethane in different densities with extra cushioning material in the critical heel and ball area for superior shock absorption. An odor-resistant, sweat-wicking and non-slippery fabric covers the whole

footbed. Excellent comfort and support to get your job done.
