PUMA® Safety

Frontside Blk/Grey Womens LOW Composite Toe Impact Resistant Toe Cap, Static Dissipating safety, Slip Resistant, Safety Shoes

- **RUBBER OUTSOLE** - This hard-wearing 572°F heat- and oil-resistant rubber outsole has a distinctive tread design with channels to clear fluids for optimum slip resistance. Due to the reinforcement of the rotation point, friction and thus signs of fatigue can be significantly reduced.
- **idCELL** - The idCELL element in the heel area consists of EVA, a very soft, shock absorbing material. It perfectly absorbs impacts and shocks when the heel strikes the ground.
- **ROTATION POINT** - The special feature of the sole is the integrated rotation point. This point in the area of the inner metatarsus is the most severely strained part while walking. By reinforcing the rotation point, friction and thus fatigue is greatly reduced.
- **EVA MIDSOLE** - Thousands of tiny bubbles in this ultra lightweight midsole ensure an optimal cushioning and improve the flexing action of the foot.
