LENS Smoke Performance Fog Technology

FRAME Crystal Black

DESCRIPTION

The rugged design of the Stinger® safety glasses features rigid TPR flared temple ends, soft nose pieces and properly placed ventilation ports to reduce fogging. With a single 9 base curve lens, it is designed for maximum impact resistance and superior side coverage. The BH633PFT also features a PFT lens. Thanks to its chemical and physical properties, Performance Fog Technology is a permanent coating that prevents the formation of condensation on the lenses by absorbing the humidity drops.
