

DAX T2
TYPE 2 HEAD PROTECTION

NATURAL

The DAX T2 is built for evolving jobsite safety standards with real-world protection where it matters most. ANSI Type 2 certified for top and side impact, it features an internal Halo EPS system for added energy absorption. A reinforced LUX HD Suspension with encased retention dial delivers a secure, durable fit. The ForgeLock magnetic chin strap keeps the helmet locked in place at height. Twiceme technology supports faster emergency response, and the modular accessory system lets you add lights, hearing protection, and face shields without drilling. Built on the iconic DAX silhouette for modern protection, comfort, and flexibility.

KEY FEATURES:

- **Meets today's jobsite rules, and tomorrow's** – ANSI Type 2, Class C certified for top and side impact protection, helping you stay compliant as Type 2 requirements become the new standard
- **Better protection where impacts actually happen** – Internal Halo EPS system adds another layer of energy absorption for lateral, front, and rear impacts; not just crown hits
- **Locked-in fit that doesn't loosen up** – LUX HD Suspension with an encased, low-profile retention dial resists impacts, jobsite abuse, and daily wear while staying comfortable all day
- **Stays secure when you're working at height** – ForgeLock magnetic chin strap won't release unless you intend it to; easy to use with gloves, solid when it counts
- **Faster emergency response if something goes wrong** – Built-in Twiceme technology gives first responders instant access to critical safety information using a smartphone
- **Built for real accessories, not gimmicks** – Dual light rails, 30mm ear cup mounts, and face shield compatibility let you configure the helmet for your task without drilling or compromising the shell
- **Designed to wear all day, not just pass inspection** – Improved airflow, comfort dome padding, and reinforced suspension components reduce fatigue on long shifts

SPECIFICATIONS

MATERIAL

- EXTERNAL SHELL: Fiber Resin Polymer
- INTERNAL SHELL: High-Density Expanded Polystyrene
- HEADBAND: Nylon, Poly-Blend, Anti-Bacterial

CERTIFICATIONS

- Certification: ANSI Z89.1, TYPE 2, CLASS C
- EN12492 (4.2.1.2, 4.2.1.3, 4.2.1.4, 4.2.2, 4.2.3)

NOTICE: The U.S. safety standard for industrial helmets covering impact absorption, penetration resistance, flame resistance, and electrical insulation ratings.

HELMET TYPE

TYPE 2 – Meets top and lateral protection requirements

ELECTRICAL INSULATION

CLASS C – Conductive - No electrical protection

OPTIONAL TESTING

Meets low or high temperature operating ranges

NOTICE: This product meets the EN12492 performance standards, including:

- 4.2.1.2 (Front energy absorption)
- 4.2.1.3 (Side energy absorption)
- 4.2.1.4 (Rear energy absorption)
- 4.2.2 (Penetration)
- 4.2.3 (Retention system strength)

Please note that we have incorporated 4.2.2 (Penetration), as we consider it extremely important. However, we did not include 4.2.4 (Retention system effectiveness) in our design.

COUNTRY OF ORIGIN

- Vietnam

APPLICATIONS OF USE

- Working-at-heights, Line-worker, Confined Space, Heavy Industrial, Rescue, Road Construction, Arborist and General Construction.

SIZING

- One size fits most
- Head Size 6 ½ - 8 in | Head Size 52-64 cm

TWICEME NFC

- Twiceme® NFC Technology: Stores emergency contact and medical data, accessible to first responders with an NFC-compatible device, providing critical information when seconds count. Twiceme is a smart safety technology that is designed to protect people before and after an incident.

HELMET WEIGHT

- 600g / 1.32lbs

ORDER LOGISTICS

- Sold as a single unit or master packed in quantities of 16.

SHIPPING DIMENSIONS

- Single Unit: 13.75 L x 12 W x 6.25 H inches
1.43 lbs | .65 kgs
- Master Carton: 27.5 L x 12.5 W x 26 H inches
22.88 lbs | 10.37 kgs

TEMPERATURE OF USE

- 30° C / +50° C | -22° F / + 122° F

DURABILITY

- 3 - 5 Year Average Lifespan

Hard hat lifespan may vary depending on the conditions of each work site. Hard hats subjected to more wear and tear or used outdoors in direct sunlight may need to be replaced more frequently. Daily inspections are the best way to determine when to replace a hard hat shell, suspension, or the entire unit. Suggested replacement is based on service life (Based on when the hard hat was placed into service, not the manufacture date).

As a general guideline we recommend replacing hard hats every 3-5 years regardless of outside appearance, but this can vary due to use and job site conditions

WARRANTY INFORMATION

- 1 Year Limited Warranty

Every LIFT Safety product is covered by a one-year (from date of purchase) warranty on manufacturing defects when purchased new from an authorized LIFT Safety Dealer. eBay sellers and other sellers may not be considered authorized LIFT Safety dealer sellers. Learn more at warranty.liftsafety.com
