

Your solution for
foot protection

Boot solutions for industry risks

Delta Plus boots are the perfect solution for food industry, agriculture, construction, and farm & ranch work environments. They protect against slips and falls while providing superb all-day comfort.

All of our boots are made in Mexico where we quality control the boot creation process from conception to completion.

Falls to the ground

Slip and trip hazards exist in almost all workplaces. For example, handling food often results in puddles of sticky or slippery substances on the floor. Ensuring that regular cleaning is carried out is important, but not enough. Workers must wear shoes that are adapted to these conditions.

The use of a safety boot provides the highest level of slip resistance. The boots designed for the food industry have an angled sole design, maximizing the boot's grip on wet or greasy surfaces. In some cases, where slipping is a major risk (e.g., dairies, fish shops), you can opt for a flat, granular sole that provides greater slip resistance.

The use of a **safety boot** provides the highest level of slip resistance.

OSHA 1910.136: Foot Protection

ASTM F2413-18 : Standard Specification for Performance Requirements for Protective Toe Cap Footwear

ASTM F3445-21 : Standard Specification for Performance Requirements when Evaluating Slip Resistance of Protective (Safety) Footwear

Sanitized® boots

The Sanitized® technology combines freshness, comfort and material protection. The antimicrobial treatment with the proven Sanitized® technology reduces the colonization and development of bacteria, mold, algae and pink stain. This protects the boots from unwanted bacterial odor, staining and material fatigue. .

Sanitized® additives provide antimicrobial protection on the surface and protect the material itself. The appearance and useful life of the boots are considerably longer due to the integrated Sanitized® technology.

Sanitized logo indicates which boots provide this protection.

Unisex sizes

Our boots come in US unisex sizes ranging from 6 – 14. These sizes provide a comfortable fit to both men and women. To help you choose your best fit, we have provided a conversion chart below for women's fit.

DRYPRO[®] 7

DRYPRO® 7 EXTRA HEAVY WORK BOOTS

The new DryPro® 7 sanitized boots are the perfect solution for extra heavy work for the food processing industry as well as agriculture, construction, and farm & ranch. These boots are oil, animal fat, mild acid and diluted hydrocarbon resistant, and Sanitized® technology reduces the colonization and development of bacteria, mold, algae and pink stain.

Comfortable fit

4.8 lb boot with 15 inch average height with cut adjustment at 13 inches

High performance PVC compound with nitrile on outsole and upper

Comfortable, waterproof vanguard design with greater durability and flexibility that also protects wearer from thermoshocks of transferring from hot and cold environments

Textile lining

Added comfort for all-day wear

High performance nitrile outsole

Better chemical resistance

Anti-slip sole

Multitrack, oil resistant anti-slip sole

Steel toe boot

Complies with ASTM, also available in plain toe

Comfortable insole

Washable resilient soft PU foam insole with breathability and thermal protection

Technology

BENEFITS OF AN ANTIMICROBIAL TREATMENT

An antimicrobial treatment of flexible PVC prevents bacteria, algae, pink stain and fungi from settling and reproducing. As a result, it delivers long-lasting and durable material protection.

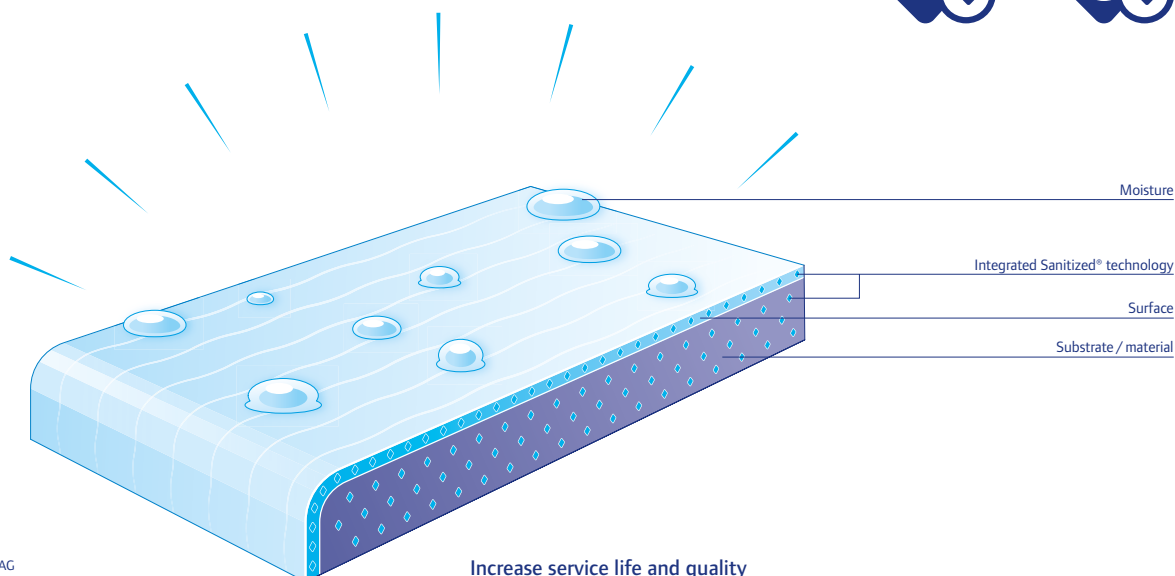

Microorganisms damage the material

Mold & mildew, bacteria, and algae destroy the surfaces unhindered and cause unpleasant odors.

LONG-LASTING HYGIENE MANAGEMENT

Long-lasting material protection thanks to Sanitized® technology

Increase service life and quality

The material enjoys durable protection thanks to Sanitized® technology, and the surface benefits from the integrated hygiene function. The result: Improved material quality and longer service life

PPE Apparel and Accessories

As a global leader in the development, production, and manufacturing of head-to-toe PPE, we provide safety-enhancing solutions to provide the best fit and function for the workplace. With continuous innovation and cutting-edge technology, we deliver solutions that keep you safe at work and bring you home safely every day.
