TECH TAGS:

Bump Cap with LED lighting technology: Protection against cranial bumps and bruises from a state-of-the-art shell. Bright LEDs illuminate projects without a flashlight or bulky headlamp.

- Patented LED lighting technology
- Two ultra-bright LEDs in the brim; two additional LEDs concealed under the brim
- Choose two brim LEDs for illumination up to 50 ft., two under the brim lights for close-up tasks or all four for maximum visibility
- LEDs emit white light, perfect for working on color-coded projects and have a bulb life of approximately 100,000 hours
- Four replaceable CR2032 long-life lithium batteries (included) for more than 30 hours of continuous light
- Available in short brim or baseball-style long brim
- EN 812: 2012
- Patented design

Choose two brim LEDs for illumination up to 50 ft. (15m), two under the brim lights for close-up tasks or all four for maximum visibility

SKULLERZ®

HEAD PROTECTION

// Innovative ventilation system and sculpted rear opening allow the shell to protect and breathe

// Certified forehead and crown coverage means maximum protection from bumps and bangs

// Unique flanged shell flexes for fit and comfort while ribs provide stability and support

// Durable, impact-resistant ABS plastic construction outside; comfortable thermo-formed foam padding inside

EN 812: 2012 CERTIFIED PROTECTION

WHAT IS EN 812?

EN 812 is currently the world's only standard for bump cap design and performance. Certification requires the cap and shell system undergo rigorous testing to prove protection from impact and penetration under various conditions.

Both the Skullerz® 8950 and 8960 Bump Caps provide certified protection you can count on for those tight spots on the job.
